

JOB DESCRIPTION

Job Title	Senior Engineer		
Directorate	Digital Services		
Reporting to			
Grade	10		
Evaluation ref:	RP084	Job ref:	Family
Role purpose			
<p>The ICT Senior Engineer at Somerset Council will be responsible for managing and coordinating the IT operations team to ensure the efficient resolution of technical incidents and the maintenance of IT infrastructure. This role involves overseeing end-user computing, application operations, and infrastructure operations to provide robust IT services. The ICT Senior Engineer will diagnose and prioritise incidents, investigate their causes, and implement resolutions. They will also manage code deployment, coordinate change-based activities, and provide specialist technical support to projects. The role requires a proactive approach to problem management, continual service improvement, and the mentoring of junior team members. The ICT Senior Engineer will collaborate with various stakeholders to ensure that IT services meet business needs and performance targets, maintaining high standards of service delivery and operational excellence.</p>			
Accountabilities			
<ul style="list-style-type: none"> • Manage, coordinate, and prioritise tasks to resolve technical incidents as quickly as possible. • Work closely with infrastructure, capacity managers, and availability managers to fix technical problems. • Identify and escalate repeat issues to the lead end-user computing engineer, incident or problem manager, and software developers. • Diagnose and prioritise incidents, investigate their causes, and find resolutions. • Manage code deployment and coordinate change-based activities. • Provide specialist technical support and assistance to projects. • Ensure delivery of non-functional requirements and continual service improvement. • Prepare and support IT operations solutions and services, both physical and virtual. • Coach and mentor junior team members. • Assist in the provision of first-class services and consistent levels of capability. 			

JOB DESCRIPTION

- Maintain secure configuration and accurate information, controlling IT assets.
- Manage service components to ensure they meet business needs and performance targets.
- Analyse and assess the impact of change requests and implement changes.
- Identify process optimisation opportunities and contribute to the implementation of proposed solutions.
- Produce relevant reports in a standard format and agreed timeframe.
